KULIM'S

# The Value of Niğde Fresh Potatoes

Grown in the fertile soils of Niğde, our potatoes are carefully cultivated and prepared to meet global market demands with flexible packaging solutions.

## ✓ Origin: Niğde

Grown in Niğde, one of Turkey's most renowned potato-producing regions, known for quality and consistency.

## ✓ Unlimited Packaging Options

Flexible packaging solutions with no limits – tailored to buyer requirements and market standards.

## ✓ Export-Ready Supply

Reliable supply capacity supported by professional loading and international logistics experience.

## ✓ Sustainable Farming

Environment-friendly farming practices focused on long-term soil health and product quality.

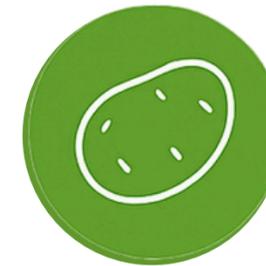

KULIM'S

# Professional Potato Production & Handling

## Production & Handling Overview

Our potatoes are produced in Niğde, Turkey, using modern farming practices...

### Controlled Production

Carefully managed cultivation process ensuring uniform size, quality, and stable supply throughout the season.

### Professional Packaging & Handling

Modern handling and packaging processes designed to protect product quality during storage and transportation.

### Export-Oriented Logistics

Experience in international shipments with flexible packaging and loading solutions tailored to buyer requirements.

# Sustainable & Responsible Potato Farming

## Crop Rotation

Planned crop rotation practices that help maintain soil fertility and support consistent potato quality.

## Soil Management

Carefully managed soil practices designed to support healthy potato growth and uniform size.

## Responsible Farming

Responsible agricultural practices focused on product safety, quality, and long-term sustainability.

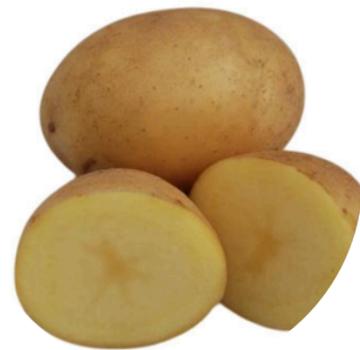

## Water Conservation

Efficient irrigation practices aimed at optimizing water use during potato cultivation.

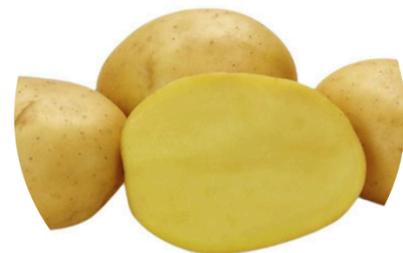

# Potato Varieties

## Alegria

Smooth skin, uniform size, and excellent taste. Ideal for fresh market and retail distribution.

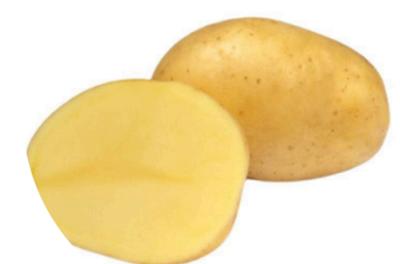

## Bettina

High yield variety with good storage performance. Suitable for export and long-distance transport.

## Jelly

Yellow flesh with firm texture. Perfect for frying, roasting, and food service use.

## Otolia

Versatile variety with balanced texture. Preferred for both fresh consumption and processing.
